Understanding Dry Eye & NuLIDS Treatment

Dry eye disease is a chronic condition where your eyes don't produce enough tears or the right quality of tears. For veterans, this condition is often more than just an annoyance - it can be a service-connected disability exacerbated by environmental exposures.

Common Symptoms

- Stinging, burning, or scratchy sensation
- Sensitivity to light
- Eye redness
- Difficulty wearing contact lenses
- Difficulty with night driving
- Watery eyes (the body's response to irritation)
- Blurred vision or eye fatigue

Why Veterans Are at Higher Risk

Veterans are disproportionately affected by dry eye due to:

- Exposure to harsh environments (sand, dust, smoke, chemicals)
- Traumatic Brain Injury (TBI)
- Post-Traumatic Stress Disorder (PTSD) medications
- Sleep apnea and CPAP use
- Prolonged visual tasks

The NuLIDS Solution

NuLIDS is a revolutionary system designed to treat the root cause of dry eye - Meibomian Gland Dysfunction (MGD).

1. In-Clinic (NuLIDS PRO): Your eye doctor performs a deep cleaning and stimulation of your eyelids to jumpstart gland function.
2. At-Home (NuLIDS Daily): You use a simple, handheld device for just one minute a day to maintain hygiene and keep glands healthy.

How to Request NuLIDS at the VA

As a veteran, you have access to world-class eye care. Here is how to request NuLIDS:

1. Schedule an Eye Exam: Contact your local VA medical center or community care provider.
2. Describe Your Symptoms: Be specific about how dry eye affects your daily life (reading, driving, sleeping).
3. Ask About NuLIDS: "I've read about the NuLIDS system for treating Meibomian Gland Dysfunction. Is this treatment available for me?"
4. Mention Federal Supply: NuLIDS is available through federal supply channels (GSA/FSS), making it easy for VA facilities to procure.
